Professional Summary

Frontend Engineer with 2+ years of experience specializing in React, Next.js, TypeScript, Tailwind CSS, and React Native (Expo). Skilled in building scalable web and mobile applications, premium user interfaces, interactive dashboards, and 3D web experiences using GSAP and Framer Motion. Experienced in REST API and Meta API integration, payment gateway integration, AI-assisted development, responsive design, Search Engine Optimization (SEO), and User Interface / User Experience (UI/UX) design.

Experience

Trawayl

January 2025 - Present

Founder & Frontend Engineer

Remote

- Architected and engineered the complete frontend of the Trawayl travel and event marketplace platform using React, TypeScript, and Tailwind CSS.
- Delivered premium, responsive user interfaces with reusable component architecture and modern UI/UX design principles.
- Built the Trawayl Partner Dashboard, including ticket management, offers, event management, and booking workflow features.
- Implemented the Trawayl Admin Dashboard, covering frontend interfaces and backend functionality for platform administration.
- Integrated REST APIs, Meta APIs (WhatsApp and Facebook), authentication, payment gateways, and third-party services.
- Crafted animation-rich user experiences using GSAP and Framer Motion.
- Optimized application performance, accessibility, SEO, and cross-browser compatibility.

Luminar Technolab

June 2024 - January 2025

MERN Stack Developer Intern

Remote

- Completed intensive training in MongoDB, Express.js, HTML5, CSS3, Tailwind CSS, React, and Node.js.
- Built responsive web applications using React and REST API integration.
- Produced reusable frontend components following modern development practices.
- Collaborated using Git version control in team-based development workflows.

Freelance

2025 - Present

Frontend Engineer

Remote

- Created modern, responsive landing pages and business websites for startups and organizations.
- Delivered high-quality user interfaces with strong emphasis on responsiveness, accessibility, SEO, and performance.
- Completed client projects including trawersee.com, flotilla.ae, alnawagold.com, tajalsafauae.com, keralastartupcarnival.com, dailyregrets.com, fortunaeximglobal.com and deynotech.com

Education

MEA Engineering College, Perinthalmanna

2020 - 2024

Bachelor of Technology (B.Tech), Computer Science & Engineering

Kerala Technological University (KTU)

Projects

Trawayl - Travel and Event Marketplace Platform

React, TypeScript, Tailwind CSS, GSAP, Framer Motion

- Engineered the complete customer-facing marketplace, including event discovery, booking flows, profile management, and authentication modules.
- Built the Partner Dashboard (ticket management, offers, event operations, booking workflows) and Admin Dashboard (user, partner, booking, event, and analytics management) with supporting backend functionality.
- Integrated REST APIs, Meta APIs (WhatsApp and Facebook), and payment gateways across the customer, partner, and admin platforms, with responsive, reusable UI components and animation-rich UX using GSAP and Framer Motion.

ReceiptLog

React Native (Expo), TypeScript, SQLite, AI Integration

- Developed an AI-powered personal finance application that automatically scans payment receipts and extracts transaction details.
- Established expense tracking, income management, and analytics dashboards with offline storage using SQLite.
- Designed premium mobile interfaces with modern animations and intuitive user experiences.

Interactive AI Portfolio Website

Next.js, TypeScript, Tailwind CSS, Gemini AI, GSAP, Framer Motion

- Created an interactive portfolio showcasing projects and professional experience.
- Integrated a Google Gemini AI chatbot with conversational responses and text-to-speech.
- Developed responsive animations and interactions using GSAP and Framer Motion, with a focus on performance and SEO.

TradeEase

React, TypeScript

- Constructed a complete stock and inventory management web application.
- Established dashboards for inventory tracking, product management, analytics, and business operations.
- Designed reusable UI components with responsive layouts and efficient data visualization.

Research

Conversion of Sign Language to Text and Speech using Machine Learning

Python, Machine Learning

- Developed a machine learning-based system using Microsoft Kinect, image segmentation, and K-Nearest Neighbors (KNN) to translate American Sign Language (ASL) gestures into text and speech.
- Improved communication accessibility for individuals with hearing and speech impairments through real-time gesture recognition.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, Python, C, C++

Frontend: React, Next.js, React Native (Expo), Tailwind CSS, GSAP, Framer Motion, Bootstrap, Responsive Web Design, Component-Based Architecture, 3D Interactive Web Experiences

Backend (Familiar): Node.js, Express.js, REST API Integration, PostgreSQL, SQLite

Tools & Platforms: Git, GitHub, VS Code, Vite, npm, pnpm, Vercel, Cloudflare, Firebase, Postman

AI Development Tools: Claude, ChatGPT, Cursor, GitHub Copilot, Gemini

Other: UI Engineering, Performance Optimization, Cross-Browser Compatibility, SEO, UI/UX Design, Animation Engineering

Certifications

Microsoft AI Classroom Series - Microsoft & NASSCOM FutureSkills Prime (Issued: December 2020)
